

ANNUAL INDEX

The Subject Index (Part I), covers original articles, biographic material, book reviews, obituaries and editorial comments.

In searching for a specific article the Author Index (Part II), should be consulted if the name of the author is known since the complete bibliographic reference is to be found after the author's name only. When there are two or more authors for an article the complete entry as shown appears only under the name of the first author.

R. indicates a book review; the title of the book is followed by the author's name, and is also listed by author under Book Reviews. Ed. indicates an editorial comment.

Obituary notes and references appear under the heading Obituaries and under the names of individuals.

Entries concerning all meetings of scientific bodies will be listed under Association Meetings.
